PORTFOLIO portfolioweb-three-sigma.vercel.app

I design, build, and verify production AI agent systems — connecting LLMs, **Model Context Protocol (MCP)** servers, enterprise APIs, and **human-in-the-loop** approval gates on Google Cloud Run and n8n. Eleven shipped projects and twelve credentials.

Skills & Tech Stack

GROUPED BY WHAT IT DOES

AGENT SYSTEMS	Google ADK · MCP · Multi-agent orchestration · Agent Skills · HITL · RAG
AUTOMATION	n8n — sub-workflows, webhooks, cron, error handling · Vapi · UiPath
CLOUD & DEPLOY	Google Cloud Run · Docker · Vertex AI · least-privilege IAM · ClickHouse · Supabase · Render
BACKEND	Python · FastAPI · TypeScript / JavaScript · SQL · PostgreSQL · Streamlit · Next.js
RETRIEVAL	Qdrant · BigQuery · Sheets & Calendar APIs · Airtable · Firecrawl · SerpAPI
MODELS & VOICE	Gemini 2.5 Flash · Claude 3.5 Sonnet · GPT-4o-mini · Llama 3.3 (Groq) · Qwen 2.5 · ElevenLabs

Selected Work

TITLES OPEN THE REPOSITORY · LIVE OPENS THE DEPLOYED BUILD

Enterprise GenAI Agent Architectures on Google Cloud / Cloud Architect

GOOGLE CLOUD

A production trilogy of agent patterns: grounded RAG over Vector Search, autonomous BigQuery SQL reasoning through an MCP server, and dynamic Python execution inside Cloud Run micro-sandboxes with least-privilege IAM and human-in-the-loop governance.

Google Cloud Run · Vertex AI · Google ADK · Model Context Protocol (MCP) · BigQuery · FastAPI · Docker

[LIVE](#) Three architectures deployed and running on Cloud Run · 40/40 (100%) on Hack2Skill APAC GenAI Academy assessments.

TravelCare AI — Autonomous Flight Rescue Agent / Agent Architect

ALIBABA CLOUD

A proactive disruption agent that detects cancellations, evaluates EU261 / UK261 / US DOT compensation eligibility, drafts regulation-cited appeal letters, and rebooks visa-safe itineraries across 14 passport rule sets.

Alibaba Cloud Model Studio · Qwen 2.5 · Atlas Agent Framework · FastAPI · Python · Docker

[VERIFIED](#) 738 passing tests across dual agent engines · 100% clean security gate · continuous 3-minute walkthrough demo.

FYF Video Pipeline — Autonomous Brand Video Studio / Lead Architect

GOOGLE CLOUD

A full-stack autonomous studio orchestrating story generation via Google ADK and Gemini, deterministic multi-format rendering via Remotion, telemetry ingestion into ClickHouse Cloud, and natural-language analytics through an MCP data officer.

Next.js · Remotion · Google ADK · Gemini 2.5 Flash · ClickHouse Cloud · MCP · Cloud Run

[LIVE](#) Deployed on Cloud Run · 74+ test suite · 20 QA verification gates · Google Cloud Agentic Cinema Hackathon entry.

Swoosh — URL Shortener & Link-in-Bio Builder / Product Builder

FASTAPI

Spec-driven build combining authenticated URL shortening, click analytics, QR sharing, admin-managed accounts, and public link-in-bio profiles — scope, acceptance testing, and release approval directed by me.

FastAPI · Python · PostgreSQL · Render · AI coding agents

[LIVE](#) Publicly deployed · 80 passing tests recorded in release evidence · 33 desktop/mobile screenshots.

AI Voice Receptionist for a Dental Clinic / AI Voice Automation Builder

N8N AUTOMATION

A conversational voice agent that handles inbound clinic calls and books calendar appointments, with call context routed through n8n backend logic.

Vapi · n8n · ElevenLabs · GPT-4o-mini · Claude 3.5 Sonnet · Google Calendar · Google Sheets

[VERIFIED](#) Call context writes through to Google Calendar events and Sheets via n8n.

A dual-agent system: one agent scrapes tech blogs, a second drafts persona-matched posts via RAG, routed to Telegram for human editing and approval before any database write.

n8n · Firecrawl · Qdrant · Supabase · Airtable · Groq · Ollama · Telegram

VERIFIED Clean data routed to Airtable and Supabase only after human-in-the-loop approval.

ALSO SHIPPED

- AI Lead Qualification & Response — Qdrant RAG score routing, Telegram alerts, drafted repliesn8n
- AI Lead Nurturing CRM — Groq scoring, Airtable + Sheets sync, 7-day Gmail dripn8n
- AI Job Matching & Cover Letter Workflow — SerpAPI matching with Telegram approval gatesn8n
- Personal Finance Capture — local Ollama parsing into Notion and Sheetsn8n
- Daily AI News Briefing — RSS summarised to Burmese on a cron schedulen8n

Credentials

- Python Data Structures — University of Michigan / CourseraNov 2025

Professional Experience

REVERSE CHRONOLOGICAL

Independent AI Automation Engineer / self-directed

JAN 2026 - PRESENT

- Built and deployed eleven AI automation systems across agent, voice, and workflow domains.
- Owned the specification, acceptance testing, and release approval on every build; AI coding agents implemented under my direction.
- Public repositories and nine recorded walkthroughs: [portfolioweb-three-sigma.vercel.app](#)

- Waiter — Gala Bangkok · fine diningJun 2025 - Dec 2025
- Waiter — Mercure Yangon Kaba Aye · all-day diningJun 2023 - Jan 2024

Client Services & Project Coordinator / Technity — media publisher

JUN 2020 - DEC 2022

- Managed client relationships with Samsung, Huawei, Vivo and Oppo — services, pricing, project details.
- Coordinated with the production team to plan and execute video shoots, meeting client deadlines.
- Oversaw each project from brief to final delivery, including task delegation and timelines.
- Handled invoices, receipts and payment follow-ups, keeping clients and the team aligned.

Education

& LANGUAGES

- Diploma of Food and Beverage Management — M.H.T.IAug 2022 - Nov 2023
- Bachelor of Applied Science, Industrial Chemistry — East Yangon UniversityFeb 2017 - Mar 2019
